Experience

ServerSide, Inc.
<http://www.serverside.net>
10/2010 – Present

10150 Lantern Road
Suite 275
Fishers, In 46037
317.596.5000

Senior Web Developer

- Developed University of Charleston web site. The web site was created using Ektron's CMS 400, ASP.net, VB.net, and the data was stored in a SQL Server 2005 database.
- Developed Mercury Computers Corporate web site. The web site was created using Ektron's CMS 400, ASP.net, VB.net, jQuery and the data was stored in a SQL Server 2005 database.
- Maintained and enhanced various existing web applications. These applications were written in ASP.net/Classic ASP and the data was stored in a SQL Server 2005 database.

Just Marketing International
<http://www.justmarketing.com>
10/2009 – 9/2010

10960 Bennett Parkway
Zionsville, IN 46077
317.344.1900

New Media Programmer

- Developed Project Brief Application. This application tracked all graphic and marketing projects at Just Marketing International. The application was written in ASP.net and C# and the data was stored in a SQL Server 2005 database.
- Developed Apex-Brasil Racing Network Intranet. This intranet based site allowed Apex-Brasil Staff and Clients to register for races and events. It also allowed members of the media to review press releases, photographs, and other media related material. The intranet was written in ASP.net and VB.net and the data was stored in a SQL Server 2005 database.
- Maintained and enhanced customer web sites and web applications. These web applications and web sites were written in ASP.net and VB.net/C# and the data was stored in a SQL Server 2005 database.

Indiana Farmers Mutual Insurance Company
<http://www.indianafarmers.com>
10/2007 – 10/2009

10 West 106th Street
Indianapolis, IN 46290
317.846.4211

Programmer Analyst

- Developed Project/Problem Tracking Report Application. This application tracked all Information Technology projects and problems at Indiana Farmers Mutual Insurance Company. The application was written in ASP.net and VB.net and the data was stored in a SQL Server 2005 database.
- Maintained and enhanced various insurance related web applications on the company's internal intranet site and public web site. These web applications were written in ASP.net and VB.net and the data was stored in a SQL Server 2005 database.
- Provided technical support on various insurance related server products. These products ran on a Windows 2003 server and that data was store in a SQL Server 2005 database.

Learn More Indiana
<http://www.learnmoreindiana.org>
12/2006 – 10/2007

101 West Ohio Street, Suite 505
Indianapolis, IN 46204
317.464.4410

Web Developer

- Maintained the Learn More Indiana web site by using a combination of SharePoint 2007, ASP.net 2.0, C#, and SQL Server 2005.

Marion County - ISA
<http://www.indygov.org/isa>
1/2005 – 6/2006

200 East Washington Street
Indianapolis, IN 46204
317.327.3100

Web Developer

- Transferred over 10 City-County wide department web sites into Microsoft Content Management Server 2001. I also created 6 different MCMS 2001 web sites for various City-County initiatives. This involved analysis of the website structure, content migration, QA support, customization and implementation, transferring webpage layouts into MCMS 2001 templates, and occasionally designing the web site. The CMS templates were written in HTML and ASP.
- Developed IndyParks Accident Report Application. This application tracked any accidents that occurred on an IndyPark facility. The application was written in ASP.net and C# and the data was stored in an Oracle 9i database.

Kelley Direct Online Programs
<http://kd.iu.edu>
3/2003 – 1/2005

777 Indiana Avenue, Suite 200
Indianapolis, IN 46202
317.278.1566

Web Developer

- As part of a team of 3 developers, we created a Content Management Application. We used this application to maintain the department web site. The site provided information about the program, information about IUPUI, course information, and instructor and staff biographies. The application was written in ASP.net along with C# and the data was stored in a SQL Server 2000 database.
- Created and maintained online learning materials for over 10 different instructors. The materials were written in ASP and HTML.

Omega Design Studio
<http://www.4omega.com>
12/1999 – 3/2003

18 N. Belmont Avenue, Suite 16
Indianapolis, IN 46222
317.423.3568

Web Developer

- Created and maintained over 20 web sites and web applications that were written in ColdFusion.
- Created and maintained over 5 web sites and web applications that were written in ASP.
- Occasionally troubleshoot computers and made upgrades
